Publication Title:

CONVERTIBLE

Abstract:

Abstract of WO2005095140

Disclosed is a convertible (1) comprising a roof (2) that is provided with a roof cover (3) and several lateral frame parts (5, 6,...) which at least partly stretch the roof cover (3) when the roof (2) is closed and succeed each other in the longitudinal direction of the vehicle. A rear frame part (5) extends from a window parapet line (7) with an upward-facing component. Said convertible (1) is configured such that the adjacent frame part (6) that follows the rear frame part (5) in the direction of travel (F) when the roof is closed (2) can be moved by means of at least one drive unit (9) provided for opening the roof without applying force via the rear frame part (5) while the rear frame part (5) is connected to a gear (10) transmitting the driving force and can be moved along by the same.
